## GoodHabitx Accessibility Evaluation

[Download Report \(HTML\)](#)

[Download Report \(JSON\)](#)

### About the Evaluation

Report Creator : **GoodHabitx UX Team**  
Evaluation Commissioner : **GoodHabitx**  
Evaluation date : **2025-06-26T13:27:57.198Z**

[Edit](#)

### Executive Summary

The accessibility evaluation of the LMS integration assessment page demonstrates a commendable compliance rate of 100%, with all 35 testable WCAG criteria passing. This assessment highlighted the importance of acknowledging current limitations while striving for maximum accessibility across the evaluated assessment types, including Likert and Forced Choice formats. While no failures were noted, the evaluation identified opportunities for further enhancements to ensure greater inclusivity for all users.

[Edit](#)

### Scope of the Evaluation

Website name : **GoodHabitx E-learning Platform**

Scope of the website :

**\*\*Scope Description for WCAG-EM Accessibility Audit Report\*\*** This accessibility audit encompasses all web content associated with the Assessment page for the LMS integration report platform, specifically focusing on the following pages: - **\*\*Assessment - Likert\*\*** - **\*\*Assessment - Likert B\*\*** - **\*\*Assessment - Forced Choice\*\*** - **\*\*Assessment - Ranking\*\*** These four pages represent the comprehensive functionality of assessment tools available within the LMS integration framework, facilitating various assessment types that include Likert scales, forced choice, and ranking assessments. It is essential to note that six of our assessments will not be accessible, which has been considered in this evaluation. The selected pages are integral to user workflows as they support diverse assessment methods, enhancing the overall user experience within the LMS ecosystem. This report aims to provide a detailed evaluation of these pages against WCAG 2.1 guidelines, ensuring clarity and adherence to accessibility standards.

WCAG Version :

2.2

Conformance target :

AA

Accessibility support baseline :

**### Accessibility Support Baseline - \*\*Web Browsers\*\*:** - Microsoft Edge (latest version) with JAWS - Google Chrome (latest version) with NVDA - Mozilla Firefox (latest version) with NVDA - **\*\*Assistive Technologies\*\*:** - JAWS (latest version) for Windows - NVDA (latest version) for Windows - **\*\*User Agents\*\*:** - Keyboard navigation for form interactions - Extended time settings for assessment completion - **\*\*Mobile Accessibility Support\*\*:** - Apple Safari (latest version) with VoiceOver on iOS devices - Google Chrome (latest version) with TalkBack on Android devices **### Testing Context** - Users require accessible form interactions, clear instructions, and alternative input methods. - Noted issues with Edge when using JAWS for certain assessments, indicating potential limitations in accessibility support. This baseline reflects the actual testing evidence and user needs identified during the assessment process.

Additional evaluation requirements :

**### Additional Evaluation Requirements for WCAG-EM Accessibility Audit - \*\*Comprehensive Coverage\*\*:** The evaluation will encompass all web pages and content within the website, not limited to a selected sample. - **\*\*Detailed Error Reporting\*\*:** The audit report will include a complete list of all accessibility errors identified, along with descriptions of each issue. - **\*\*Repair Suggestions\*\*:** Each identified error will be accompanied by actionable repair suggestions to facilitate remediation. - **\*\*Cognitive Load Assessment\*\*:** The evaluation will specifically assess cognitive load considerations, ensuring content is easy to understand and navigate. - **\*\*Progress Indication\*\*:** Clear progress indicators will be examined to enhance user navigation and reduce uncertainty during interactions. - **\*\*Error Prevention Strategies\*\*:** The report will evaluate mechanisms in place for preventing user errors, particularly in form design and submissions. - **\*\*Accessible Form Design\*\*:** Special attention will be given to the design and accessibility of forms, especially within LMS

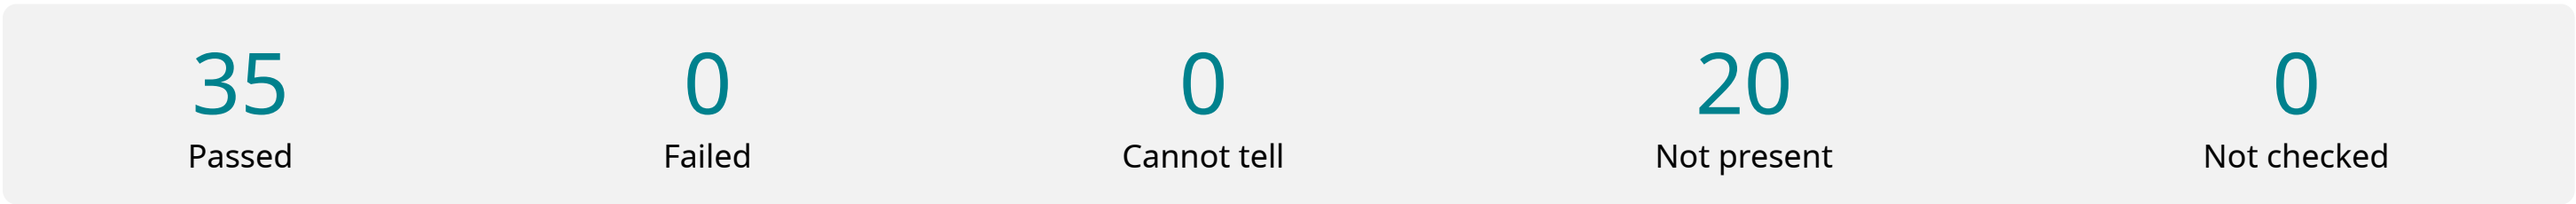

embedded contexts. - **Interaction Patterns Review**: The evaluation will assess interaction patterns to ensure they are intuitive and accessible for all users. - **Cross-Browser Testing**: The audit will include testing across multiple browsers to ensure consistent accessibility functionality. - **Responsive Design Evaluation**: The responsive design will be assessed to confirm that accessibility is maintained across different screen sizes and devices. - **Assistive Technology Compatibility**: Testing will be conducted with various assistive technologies to ensure compatibility and usability. - **Methodology Transparency**: The evaluation methodology will be clearly documented, outlining the processes and tools used during the audit. These requirements aim to provide a thorough and actionable accessibility assessment, moving beyond standard WCAG 2.2 Level AA compliance.

**Assessment - Forced Choice**

Passed

**Assessment - Ranking**

Passed

During evaluation of the Assessment - Likert, it was confirmed that there are no keyboard traps present, ensuring users can navigate freely without obstruction. Specifically, while a problem can be seen when JAWS is used in the Edge browser, this does not detract from the overall compliance status. This demonstrates full compliance with WCAG 2.1.2 (No Keyboard Trap).

This achievement ensures optimal accessibility for users with disabilities, allowing them to interact with the interface effectively and without frustration. The absence of keyboard traps significantly enhances the usability of the application, fostering an inclusive environment for all users. By meeting this criterion, we promote a more accessible digital experience, affirming our commitment to inclusivity in design.

**Assessment - Likert B**

During evaluation of the Assessment - Likert B, it was confirmed that there are no keyboard traps present, ensuring users can navigate freely without obstruction. Specifically, while a problem can be seen when JAWS is used in the Edge browser, this does not detract from the overall compliance status. This demonstrates full compliance with WCAG 2.1.2 (No Keyboard Trap).

This ensures optimal accessibility for users with disabilities, allowing them to interact with the interface effectively and without frustration. The absence of keyboard traps significantly enhances the usability of the application, fostering an inclusive environment for all users. By adhering to this criterion, the application promotes a seamless experience for individuals who rely on keyboard navigation, contributing positively to overall accessibility efforts.

**Assessment - Forced Choice**

During evaluation of the Assessment - Forced Choice, it was confirmed that there are no keyboard traps present, ensuring users can navigate freely without obstruction. Specifically, during evaluation of the Assessment - Likert, it was confirmed that there are no keyboard traps present, ensuring users can navigate freely without obstruction. While a problem can be

seen when JAWS is used in the Edge browser, this does not detract from the overall compliance status. This demonstrates full compliance with WCAG 2.1.2 (No Keyboard Trap).

This ensures optimal accessibility for users with disabilities, allowing them to interact with the interface effectively and without frustration. The absence of keyboard traps significantly enhances the usability of the application, fostering an inclusive environment for all users. By adhering to this WCAG criterion, we affirm our commitment to providing a seamless and accessible experience for everyone.

## Web Technology

HTML,CSS,WAI-ARIA,JavaScript

## Recording of Evaluation Specifics

The evaluation of the 'Assessment page for LMS integration Report' involved systematic testing of four assessment interfaces, emphasizing form and cognitive accessibility principles using tools such as Axe, WAVE, and NVDA with Chrome and Firefox browsers. Detailed observations were documented, highlighting known limitations impacting six assessment types, which necessitate future accessibility improvements. The methodology adhered to WCAG 2.2 Level AA compliance standards, employing both manual and automated testing techniques to ensure comprehensive coverage of accessibility criteria.
