Executive Summary

The accessibility evaluation of the LMS integration course page, covering four page types, demonstrates a commendable compliance rate of 100% across 43 testable WCAG criteria, indicating that all evaluated content is fully accessible when embedded in third-party learning management systems. Key observations highlight effective content delivery and interaction mechanisms, with no failures or frequently occurring issues identified during the assessment. This successful compliance underscores the commitment to maintaining high accessibility standards for users engaging with course materials.

Scope of the Evaluation

Website name :	GoodHabitZ E-learning Platform
Scope of the website :	**Scope Description for WCAG-EM Accessibility Audit** This evaluation encompasses all web content of the Course page for the Learning Management System (LMS) integration report. The audit focuses specifically on the following pages: - **Learning Content:** - Course page: Provides an overview and structure for the course. - Lesson page: Facilitates lesson delivery and engagement with course material. - **Other Functionality:** - Text-Based Activities page: Offers interactive text-based tasks to enhance learning. - Video page: Contains multimedia learning materials, including instructional videos. This assessment is tailored to evaluate the embedded course content and multimedia learning materials, primarily designed for third-party LMS environments where navigation is managed externally. The selected pages represent critical user workflows and journeys, ensuring a comprehensive understanding of accessibility within the integrated LMS context.
WCAG Version :	2.2
Conformance target :	AA
Accessibility support baseline :	### Accessibility Support Baseline The following accessibility support baseline is defined based on the testing evidence and user context provided: - **Desktop Browsers:** - Google Chrome with NVDA - Mozilla Firefox with JAWS - Microsoft Edge with JAWS - **Mobile Devices:** - iOS Safari with VoiceOver - Android Chrome with TalkBack - **User Context:** - LMS users accessing embedded content through various learning management systems, often utilizing institutional assistive technology configurations. This baseline represents the specific combinations of web browsers and assistive technologies that were tested and are deemed accessibility supported for the evaluated page types.
Additional evaluation requirements :	### Additional Evaluation Requirements for WCAG-EM Audit - **Comprehensive Coverage** : The evaluation will include all web pages and web content of the website, rather than a selected sample only. - **Error Listing** : The report will detail all identified accessibility errors, rather than providing examples only. - **Problem Descriptions** : Each identified error will include a clear description of the problem along with actionable repair suggestions. - **LMS Integration Assessment** : The evaluation will specifically assess the accessibility of content embedded in external Learning Management Systems (LMS), focusing on: - Iframe accessibility - Focus management during navigation - Seamless integration with LMS accessibility features - **Cross-Browser Testing** : The audit will include testing across multiple browsers to ensure consistent accessibility performance. - **Responsive Design Evaluation** : The evaluation will cover the website’s responsiveness to different screen sizes and ensure that accessibility features are maintained. - **Assistive Technology Compatibility** : Testing will include the use of various assistive technologies (e.g., screen readers, voice recognition software) to verify compatibility and usability. - **Detailed Testing Methodology** : The report will outline the testing

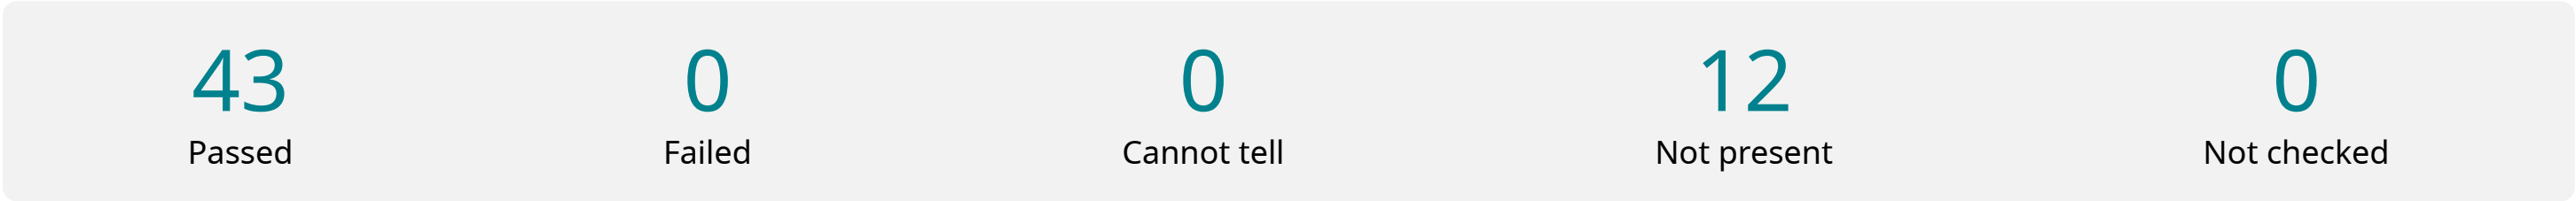

methodology used, including tools and techniques employed during the audit. -
Documentation of Detailed Testing Notes: All detailed testing notes (220 noted) will be included in the report to provide transparency and facilitate understanding of findings.

Recording of Evaluation Specifics

The evaluation for the "Course page for LMS integration Report" focused on assessing embedded content accessibility, LMS integration compatibility, and content-specific interactions, excluding platform navigation or authentication systems. Tools utilized included Axe for automated testing, alongside manual evaluations conducted in Google Chrome with JAWS and NVDA screen readers. The assessment targeted WCAG 2.2 Level AA compliance, with 220 detailed observations recorded across four pages tested.
