## Recording of Evaluation Specifics

For the Mobile App Report, evaluation was conducted using actual mobile devices equipped with screen readers (e.g., VoiceOver, TalkBack) and voice control technologies to assess WCAG 2.2 Level AA compliance. The testing approach included orientation testing and analysis of mobile usability patterns, ensuring comprehensive accessibility evaluation. Observations were documented across 55 detailed notes addressing specific success criteria, including 1.1.1, 1.2.1, and 1.2.2, reflecting a thorough methodology for assessing the app's accessibility features.
